

## #dioptr

### Sharp image center, out-of-focus edges

#### Description

Our spot dioptr is a classic dioptr with a plain area in its center. This leads to a sharp image in the middle and an out-of-focus area towards the edges of the frame. The effect is controllable and reaches from subtle to strong, depending on the dioptr's strength and the diameter of the plain area.

#### Application

This filter creates very special, dreamy images with an in-focus center. It guides the eye of the viewer towards a designated area.

## Key Features

- Plain area: 25 mm or 50 mm
- Strengths: +1/2, +1, +2
- Usable in compatible matte boxes
- No exposure compensation
- Broadband coating (BBAR)

**Sizes:** 138 mm

**Mounting:** Drop-in filter cell
